Title: **Request for consideration to modify glyph and attributes for USAT-04057**
Author: Henry Chan
Type: Individual Contribution
Date: 2019/06/08

The current glyph in the code charts for U+2D0AA (USAT-04057) is as follows:

However, according to the discussion in https://github.com/hfhchan/irg/issues/67, the original source is as follows:

U+2D0AA (USAT-04057) is a variant of 卐, and there is a resemblence to 卍. However, the current glyph for U+2D0AA (USAT-04057) is quite far from the original evidence, and doesn't resemble 卍 at all.

I suggest that the glyph for U+2D0AA (USAT-04057) be modified as follows:

Glpyh: http://glyphwiki.org/wiki/u2d0aa-var-001
TTF file: http://glyphwiki.org/glyph/u2d0aa-var-001.ttf

As a result of the glyph change, it is suggested that the Radical be changed to 4 (slash) 丿 and Stroke Count changed to 3.
