Doc Type: ISO/IEC JTC1/SC2/WG2/IRG
Title: Request to move the source reference for UK-02830
Source: Andrew West
Status: Member Body Contribution
Action: For consideration by IRG, WG2 and UTC
Date: 2021-11-15

Background

UK-02830 歟 was submitted for IRG WS2015, but it was unified with U+238A7 歟 because it had the same glyph form as U+2F8F0 (see <https://hc.jsecs.org/irg/ws2015/app/?find=UK-02830>). However, TCA subsequently requested the disunification of U+2F8F0 (see <https://appsrv.cse.cuhk.edu.hk/~irg/irg/irg51/IRGN2338Disunify7Ideographs.pdf>), and a new character was encoded as U+4DBE in the CJK Unified Ideographs Extension A block for Unicode 13.0 (see Figs. 1-3 below).

Request

As the glyph form of UK-02830 matches U+4DBE, we request that the UK source reference is moved from U+238A7 to U+4DBE.
