

Doc Type: ISO/IEC JTC1/SC2/WG2/IRG
Title: IRG N2775 Update of V-Source Representative Glyph in Extension J
Source: Vietnam
Status: National Body Proposal
Authors: Lee Collins
Action: For consideration by the IRG
Date: 2024-11-17

Review of Extension J has found a design flaw in the glyph of V0-482F in the Vietnamese reference font, Nom Na Tong-Regular.ttf. In response, Vietnam will provide an updated version of the font with changes to this glyph.

The change replaces the element 丩, with 丩, but both elements are composed of two strokes, so there is no corresponding change in the values of kRSKangxi, kRSUnicode, or kTotalStrokes.
