➤ Preface:

This document proposes a revision request for the T-Source of ISO/IEC 10646, specifically for the range of T3 to T7, where the glyphs are inconsistent with the CNS 11643 codebook glyphs. Additionally, a revision request for the mapping codepoints is also submitted.

Regarding the T3 to T7 sections, the codebook glyphs of CNS 11643 originate from the MOE (Ministry of Education). The MOE hired philology experts to discuss issues such as glyph consistency and document sources, and subsequently revised some glyphs. The BSMI (Bureau of Standards, Metrology and Inspection) has completed the revision of planes 3 to 7 of CNS 11643 based on the new glyph versions, and the updated version is expected to be announced in 2025. The Full Font Database (全字庫) website will also be updated synchronously.

Therefore, TCA submitted T-Source glyph modification request to IRG and WG2.
