

Doc. Type:	Member body contribution
Title:	Feedback to IRG N2974
Source:	TCA
Status:	Input to IRG meeting 67
Action:	For consideration by JTC1/SC2/WG2/IRG
Distribution:	IRG Members and Ideographic Experts
No. of pages:	2
Appendixes	None
Medium:	Electronic

Regarding [IRG N2974](#), the proposer pointed out a glyph issue in the T-Source of U+3097C (T13-2F35). TCA responds as follows:

The original evidence for this character was derived from the *Dictionary of Chinese Character Variants* (異體字字典), an online dictionary maintained by the National Academy for Educational Research (NAER). Upon receiving N2974, TCA reported the issue to NAER and provided several editions of 龍龕手鑑 for comparison (Table 1). In some of these editions, the upper-left component 米 is written in its standard form, with no hook at the bottom.

Table 1 《龍龕手鑑》

1	2	3	4
			
Original evidence in WS2015	卷三 明[1368-1644]，抄本 影宋抄本	卷四上 清[1644-1911]，刻本	卷四 吳縣李鼎元 清嘉慶14年[1809]，刻本

Both the hooked and unhooked forms of 𥄎 are attested in the sources. After review and discussion, NAER agreed to adopt the unhooked form as the standard glyph, and has since updated the entry on its website (Figure 1).

異體字						
-003 𥄎	-007 𥄎	-002 𥄎	-006 𥄎	-004 𥄎	-005 𥄎	-001 𥄎
說 明						
異 體 字	[A02800-003] 𥄎 目-10-15					
內 容	[關鍵文獻] 《龍龕手鑑·目部》。 《中華字海·目部》。

Accordingly, TCA agrees with the suggestion in IRG N2974 and will update the glyph of U+3097C (T13-2F35) to match the revised form in the *Dictionary of Chinese Character Variants*, as shown in Table 2. The updated font file is submitted to IRG and WG2.
