

Title: Proposal on the glyph issue of U+21D0A and U+20553
Source: Wang Xieyang (王谢杨)
Meeting: IRG #67
Status: Individual Contribution
Action: For consideration by IRG and China NB
Page: 2

Currently, the representative glyph of U+21D0A is identical to the glyph of U+20553.

20553  13.5	 T5-233A	21D0A  45.4	 GHZ-21022.03
--	--	--	---

However, the representative glyph of U+21D0A was different before.

Glyph	Version of The Unicode Standard	Released Date
 21D0A	5.1.0	2008-04-04
21D0A   45.4 GHZ	5.2.0	2009-10-01
21D0A   45.4 GHZ-21022.03	6.0.0	2010-10-11

Although the current glyph of U+21D0A is academically preferable, it does not align with the glyph shown in its source reference, 《汉语大字典》.

 說文·月部

同“青”。《玉篇·月部》：“青，幬帳也。”按：《說文·月部》楷作“青”。

《汉语大字典》（第一版），第 1022 页，左栏，第 3 字

𡵓 𡵓 說文·冂部

同“青”。《玉篇·冂部》：“𡵓，幬帳也。”按：《說文·冂部》楷作“青”。

《汉语大字典》（第二版），第 1095 页，左栏，第 6 字

Accordingly, I recommend that China revise the representative glyph of U+21D0A to the original one to avoid duplication.
